

```
export type MarketComp = {
  id?: string;
  title: string;
  price: number;
  shipping?: number;
  condition?: string;
  marketplace: string;
  url?: string;
  imageUrl?: string;
  // 'browser' was removed – it
  implied scraping via browser
  automation,
  // which was never implemented
  and shouldn't be a standing
  option in the
  // type system. Only 'api'
  (official Browse API), 'import'
  (user-provided
  // CSV/export), and 'mock'
  (demo data, clearly labeled) are
  real sources.
  source: 'api' | 'import' |
  'mock';
```

```
};
